

[GOLF CLUB HEAD AND METHOD OF PRODUCING THE SAME]

Abstract

The present invention relates to a golf club head and the method for making the same. The golf club head in the present invention comprise a recess which has a polymer insert composed of a thermoplastic transparent polymer material in a thickness of 2 to 25 mm with a gloss and lustrous surface. The recess can be formed in the striking plate of a putter head, the bakcside of an iron head or the crown of a wood head. The thermoplastic transparent polymer material can be selected from the group consisting of polymethacrylate, polyacrylate, polycarbonate, polyethylene terephthalate, transparent polypropylene, transparentpolyethylene, transparent polyvinyl chloride, transparent nylon, thermoplastic polyurethane, and the mixtures thereof.
